

## TAP3 Roaming and Data Clearing Outsourcing Services

### Overview

A better solution to help Operator's control their international roaming costs.

In response to many GSM Operators request to reduce both their in-house TAP development and external Data Clearing costs, TAI introduces "Roaming and Data Clearing Outsourcing Services". This includes a fully featured data clearing system and enables carriers to gain full control over their data clearing and roaming data handling. A tighter grip on the roaming data flow is a giant leap for revenue assurance. Typical client cases show an ROI of 2 to 6 weeks, a figure which illustrates the paramount importance of taking a closer look at roaming data.

Select the best partner .

The TTT is provided by the GSM Association to ensure compatibility between carriers and conformity to the TAP3 standard.
